### Stroke Training and Awareness Resources (STARS)

**Introduction**

This e-learning resource provides a learning tool for health and social care staff to enable them to become more knowledgeable and skilful in the challenging area of stroke care. The resource is based on the Stroke Core Competencies which were published by NHS Education for Scotland (NES) in 2005.

The website provides a multidisciplinary resource which focuses on a wide range of core knowledge and skills required by all staff when delivering stroke care.

**What are Core Competencies?**

Core Competencies are those which all health and social care staff working with people affected by stroke should **know about** (knowledge) or be **able to perform** (skills).
