The National Campaign for Cardiac Rehabilitation - Petition

We the undersigned believe that cardiac rehabilitation is an inexpensive treatment that saves lives and improves the quality of life for people living with the burden of cardiovascular disease. We further believe that it is unacceptable that 60% of UK patients who need it do not have access and that this is a clear denial of necessary treatment to patients in need.

Cardiac rehabilitation must be fully resourced and funded in accordance with the British Association for Cardiac Rehabilitation standards. We call on UK Governments and local health providers to ensure that, by the end of 2010, every heart patient has access to a high quality cardiac rehabilitation programme.
